

Day A

Tuesday, October 6, 2026 — same loads as 9/29, lighter on the left knee

Nothing goes up today. Nine exercises repeat 9/29's weight and reps, with 25 lb still the top weight. Goblet Squat drops to 15 lb and a chair-depth squat because of the left knee, and Single-Leg Balance Reach is the other knee watch. If the chiropractor tells you something different about the knee, follow that over this sheet.

Watch today: Goblet Squat and Single-Leg Balance Reach (left knee, sore on Monday), and Dumbbell Bench Press (the front of the shoulder was mildly sore after the last Day A). Stop that exercise if pain or irritation shows up, even mildly, and write down which one and where.

Last session	Exercise	Sets x Reps (today)	Weight (today)	Rest between sets	Actual
9/29: 12 x 3 at 25 lb (top of range)	Goblet Squat, down to a chair (<i>knee watch</i>) Sit back until you touch the chair, then stand. Only as deep as the left knee is happy with.	3 x 10	15 lb (<i>down from 25</i>)	60–90 sec

9/29: 10 x 3 at 10 lb 10/1: 10 x 3 at 10 lb	Hammer Curl	3 x 10	10 lb	30–60 sec	
9/29: 10/side x 3 at 8 lb 10/1: 10/side x 3 at 8 lb	Dumbbell Triceps Kickback	3 x 10/side	8 lb	30–60 sec (after both sides)	

Notes: Warm-up is 15 minutes; a flat walk or the hill, whichever the knee prefers (it felt better uphill on Monday). If the squat feels completely normal at 15 lb, write that down and 25 lb comes back next time. If the knee hurts on the squat even at chair depth, skip it and do one extra set of Glute Bridge. Take 1–2 minutes between exercises, and stand or walk around between sets. Stop rule: any sharp, burning, tingling, or spreading pain is a stop, and mild irritation in a watch exercise is a stop for that exercise only.
