

Day B

Thursday, October 8, 2026 — same weights as 10/1, one swap for the hip

No weight goes up today. Every exercise stays at 10/1's weight, with 25 lb still the top. Sumo Deadlift, Reverse Lunge, and Bent-Over Row have room for a rep or two more if they feel easy. The Stability Ball Hip Bridge is on hold after irritating the left glute two Thursdays in a row; the two-leg Glute Bridge takes its place.

Watch today: Dumbbell Lateral Raise (the first set irritated your left arm on 10/1) and Glute Bridge (standing in for the hip bridge). Stop that exercise if irritation shows up, even mildly, and write down which one and where.

Notes: Warm-up is 15 minutes, flat walk or the hill. Where a range is shown (8–10, 9–10, 13–15), last time's number is fine; add reps only if every set feels easy. Side Plank stays unweighted, the way you did it on 10/1. Take 1–2 minutes between exercises, and stand or walk around between sets. Stop rule: any sharp, burning, tingling, or spreading pain is a stop, and mild irritation in a watch exercise is a stop for that exercise only.
