

Day C — Post-Deload

Sunday, September 13, 2026

First working Day C session back from deload. The "Last working session" column below is your real 8/30 pre-deload numbers, not the 9/6 deload numbers. Four exercises maxed out reps at 10 lb that day — standard double-progression move is up to the next dumbbell weight (12.5 lb) with reps reset to the bottom of range. Bird Dog, Dead Bug, and Single-Leg Glute Bridge also topped their ranges, but they're bodyweight with no weight to add — per the plan's progression scheme, the next lever there is tempo (slower, more controlled reps), not more reps or more weight.

Last working session (8/30)	Exercise	Sets × Reps (today)	Weight (today)	Actual
10 lb × 12/side (maxed)	Bulgarian Split Squat	3 × 8/side	12.5 lb	
10 lb × 10/side (maxed)	Single-Leg Romanian Deadlift	3 × 8/side	12.5 lb	
10 lb × 12 reps (maxed)	Dumbbell Incline Press	3 × 8	12.5 lb	
10 lb × 8/side	Renegade Row	3 × 9/side	10 lb	
bodyweight × 10/side (maxed)	Bird Dog	2 × 8/side (slow tempo)	bodyweight	
bodyweight × 12/side (maxed)	Dead Bug	2 × 10/side (slow tempo)	bodyweight	
10 lb × 40 ft/side (maxed)	Dumbbell Overhead Carry	3 × 30 ft/side	12.5 lb	
bodyweight × 12/side (maxed)	Single-Leg Glute Bridge	3 × 10/side (slow tempo)	bodyweight	
black band × 15 reps	Band Pull-Apart	3 × 16–18	black band	

Recommendations: Bulgarian Split Squat, Single-Leg Romanian Deadlift, Dumbbell Incline Press, and Dumbbell Overhead Carry all hit the top of their rep range at 10 lb on 8/30 — moving up to 12.5 lb with reps back at the bottom of range (double-progression, same move made on Days A and B when the 25 → 30 lb jump happened there). Renegade Row still has room in its 6–10/side range, so it stays at 10 lb and just keeps building reps. Bird Dog, Dead Bug, and Single-Leg Glute Bridge are all bodyweight and all topped their ranges — since there's no weight to add, this session adds a slower, more controlled tempo (a 2–3 second hold or lowering) at reps reset to the bottom of range, rather than pushing reps past the prescribed ceiling. Band Pull-Apart stays on the black band — it's still at the bottom of its 15–20 range, so just keep building reps there.
