Day A

Wednesday, October 14, 2026 — same weights as 10/6, second session for three exercises

No weight goes up today. Bench Press, Single-Leg Balance Reach, and Face Pull are on session two of three at the top of their range. Goblet Squat, Romanian Deadlift, and Single-Arm Row have room for a rep or two more if they feel easy. Everything else repeats 10/6.

Watch today: Dumbbell Bench Press (the Incline Press irritated your left shoulder on Monday at half this weight) and Band Face Pull (one of three possible sources of last Thursday's mild arm irritation). If the Bench Press bothers the shoulder, drop to 20 lb or stop, and write down what happened.

Last session	Exercise	Sets × Reps (today)	Weight (today)	Rest between sets	Actual

10/6: 10/side × 3 at 8 lb 10/8: 10/side × 3 at 8 lb	Dumbbell Triceps Kickback	3 × 10/side	8 lb	30–60 sec (after both sides)	

Notes: Warm-up is 15 minutes, flat walk or the hill. Where a range is shown (10–12), last time's number is fine; add reps only if every set feels easy. A Bench Press done at 20 lb does not count toward its three sessions at 25 lb. Take 1–2 minutes between exercises, and stand or walk around between sets. Stop rule: any sharp, burning, tingling, or spreading pain is a stop, and mild irritation in a watch exercise is a stop for that exercise only.
