Day A

Tuesday, October 20, 2026 — first day of the new exercise lineup

Five new exercises today, so treat it as a learning session. Starting weights for the new ones are a guess: if a set feels easy, note it and the weight goes up next time. Romanian Deadlift, Row, Carry, Face Pull, and the arm exercises carry on from before.

Watch today: Wall Push-Up and Face Pull (left arm and shoulder) and Hip Thrust (left hip). Stop that exercise if irritation shows up, even mildly, and write down which one and where.

New	Stability Ball Crunch *(new core)* Lower back on the ball, feet wide, curl ribs toward hips, lower slowly.	2 × 12–15	bodyweight	

Notes: Drink a full glass of water before the warm-up. Warm-up is 15 minutes. Target: 45–50 minutes of strength work, not counting the warm-up. Write your start and finish times here: _____ to _____. Today only, after a poor night's sleep: 2 rounds on the last pairs is fine, and use lighter weights if a set feels heavy. Stop rule: any sharp, burning, tingling, or spreading pain is a stop, and mild irritation in a watch exercise is a stop for that exercise only.
