

# Strength Training — Day A

Tuesday, August 4, 2026 | 8:30–9:45am

**Warm-up:** 15-minute hill warm-up walk, then strength training below (45–60 min total).

## Last Session (Tue, Jul 28)

Goblet Squat, Romanian Deadlift, Floor/Bench Press, Single-Leg Balance Reach, Plank, and Band Face Pull all hit or blew past the top of their rep range on every set — clear signal to add load across the board. Farmer's Carry landed mid-range (50 of 40–60 ft), so no change needed there yet. Single-Arm Row was a deliberate wave-loading experiment last time (heavy/light/heavy across sets, confirmed intentional) rather than a standard set — today's target below assumes returning to one consistent weight, but continue the experiment instead if that's still the plan.

## Exercises

| Exercise                        | Last Time          | Today's Target       | Set 1 | Set 2 | Set 3 |
|---------------------------------|--------------------|----------------------|-------|-------|-------|
| Goblet Squat (dumbbell)         | 20 lb x 12 (x3)    | 25 lb x 8-12         |       |       |       |
| Dumbbell Romanian Deadlift      | 25 lb x 12 (x3)    | 30 lb x 8-12         |       |       |       |
| Dumbbell Floor/Bench Press      | 20 lb x 12 (x3)    | 25 lb x 8-12         |       |       |       |
| Single-Arm DB Row (side)        | 20/15/20 lb, wave* | 18-20 lb x 8-12*     |       |       |       |
| Single-Leg Balance Reach (side) | 8 lb x 11-15       | 10-12 lb x 8-10      |       |       |       |
| Plank                           | 45 sec (x3)        | 45-60 sec            |       |       |       |
| Dumbbell Farmer's Carry         | 40 lb x 50 ft      | 40 lb x 50-60 ft     |       |       |       |
| Glute Bridge                    | 10 lb x 15 (x3)    | 12-15 lb x 15        |       |       |       |
| Band Face Pull                  | band x 15 (x3)     | heavier band x 12-15 |       |       |       |

Set columns are for weight used and reps completed (e.g. "25 lb x 10") — fill in by hand during the session.

**Progression:** once you hit the top of the rep range on all sets for an exercise, add weight next session and drop back to the bottom of the range (double-progression, Fortify-compatible).

**Deload:** every 4–6 weeks, same exercises at ~60% of usual weight for one week.

\*Single-Arm Row: last session was an intentional wave-loading experiment (confirmed), not a standard progression signal — target shown assumes returning to a single consistent weight; adjust if continuing to experiment.
