

Day A

Tuesday, September 22, 2026

No exercise topped its range on 9/15, so no automatic weight/level bumps today — everything keeps building at the same load. Two things worth watching: Bench Press is close to a clean top-of-range across all three sets (12/12/10 last time), and Glute Bridge is closing in on the 20-rep soft ceiling at the 30 lb hard cap — once that hits, the next lever is tempo/pause, not more weight.

Last session (9/15)	Exercise	Sets × Reps (today)	Weight (today)	Actual
30 lb × 10/10/10	Goblet Squat	3 × 10–12	30 lb	
30 lb × 10/10/10	Dumbbell Romanian Deadlift	3 × 10–12	30 lb	
25 lb × 12/12/10	Dumbbell Floor/Bench Press	3 × 12 (<i>goal: clean 12/12/12 before a weight bump</i>)	25 lb	
25 lb × 8/8/8/side	Single-Arm Dumbbell Row	3 × 9–10/side	25 lb	
12.5 lb × 8/8/8/side	Single-Leg Balance Reach	3 × 9–10/side	12.5 lb	
shoulder-tap × 60/60/60 sec (clean)	Plank — shoulder-tap variation	2 × 60 sec (<i>or stretch to 65–70 sec if 60 felt solid — your call</i>)	bodyweight	
30 lb × 90 ft × 3	Dumbbell Farmer's Carry	3 × 90–100 ft	30 lb	
30 lb × 18/18/18	Glute Bridge	3 × 18–20	30 lb	
green band × 12/12/12	Band Face Pull	3 × 13–15	green band	

Recommendations: Everything held within range on 9/15 — no exercise hit the top of its rep range at its current weight, so nothing steps up automatically today. Goblet Squat, Romanian Deadlift, Single-Arm Row, Single-Leg Balance Reach, Farmer's Carry, and Band Face Pull all just keep building reps at the same weight/band as last time. Two things to watch: Bench Press was 12/12/10 last time (much more consistent than 9/8's 15/15/8 spread) — the goal today is a clean 12/12/12 before it's a real candidate for a weight bump. Glute Bridge is at 18 reps on the 30 lb hard cap, closing in on the 20-rep soft ceiling — if you hit 20 clean across all three sets today, the next Day A session moves to a tempo/pause add rather than more weight, since 30 lb is the program's hard dumbbell ceiling. Plank's shoulder-tap variation held a clean 60 sec on 9/15 (matching the no-tap version's prior hold) — staying at 60 sec is fine, or you can test a small stretch to 65–70 sec if it felt solid; flag whichever you do so it goes in the plan notes. Single-Leg Balance Reach: the right side was noted as still catching up to the left on 9/15 — worth a quick gut-check today on whether that gap is narrowing.
