

Day B

Thursday, September 24, 2026 — shoulder-recovery session

Overhead Press swapped out for a Goblet Walk, at your request. No overhead pressing today while the anterior deltoid heals. Goblet Walk is just a loaded carry, held at chest height, no shoulder flexion/extension — the same kind of swap already used on Day C (9/20) for the same left shoulder issue. Start light (12.5 lb, the weight already used for that Day C substitution) and stop the set early if the shoulder objects at all, even holding the weight still.

Nothing else steps up this session either, per your call. Every other exercise holds at 9/17's exact weight and target — no bumps, even where one would normally be due (Hip Bridge, Side Plank, Face Pull's pause). The goal today is finishing the session clean, not chasing progress, so the shoulder gets real recovery time.

Last session (9/17)	Exercise	Sets × Reps (today)	Weight (today)	Actual
30 lb × 8/8/8	Dumbbell Sumo Deadlift	3 × 8	30 lb	
30 lb × 9/9/9/side	Dumbbell Reverse Lunge	3 × 9/side	30 lb	
— (new swap, replaces Overhead Press)	Dumbbell Goblet Walk	3 × 30 ft (<i>stop short of that if the shoulder complains at all</i>)	12.5 lb	
green band × 13/13/13	Band Bent-Over Row	3 × 13	green band	
5 lb × 20/20/20 (hit soft ceiling)	Stability Ball Hip Bridge/Hamstring Curl	2 × 20 (<i>holding at 5 lb today, not bumping</i>)	5 lb	
10 lb × 55/55 sec/side (hit target)	Side Plank	2 × 55 sec/side	10 lb	
30 lb × 80/80 ft/side (hit target)	Single-Arm Suitcase Carry	3 × 80 ft/side	30 lb	
green band × 15/15/15, 2-sec pause	Band Face Pull	3 × 15, same 2-sec pause	green band	
10 lb × 8/8/8 (below 12-rep reset target)	Dumbbell Lateral Raise	3 × 8	10 lb	

Notes: Overhead Press is out entirely for this session — no per-side weight or reps to hit, just the Goblet Walk instead, kept easy on purpose. Stability Ball Hip Bridge and Side Plank both had a bump due today (Hip Bridge to 8 lb, Side Plank to 55–60 sec) — held flat at last session's numbers instead, per your call not to push anything this time. Band Face Pull's optional 3-second pause is also skipped for the same reason — staying at the 2-second version that already worked on 9/17. Everything else (Sumo Deadlift, Reverse Lunge, Bent-Over Row, Suitcase Carry, Lateral Raise) is set to repeat 9/17's exact numbers, not build past them. Once the shoulder's fully clear, the next worksheet can pick the normal progressions back up — including whether Overhead Press comes back or the Goblet Walk earns a permanent spot.
