

Day C

Sunday, September 27, 2026 — back to the regular exercises

Nothing goes up today. Every exercise repeats last time's (9/20) weight and reps. Six of them hit the top of their range that day, but under the new rule an exercise needs the top of its range on every set for three sessions in a row, with no irritation, before it gets heavier. Today is session one of three for those. The point today is a clean session back.

Three to watch: Single-Leg Glute Bridge (like the hip bridge that irritated your hip), Band Pull-Apart (like the face pull that irritated your shoulder), and Dumbbell Incline Press (a press, like the bench press that flared the shoulder). Do these with control and stop that exercise if the irritation comes back, even mildly. Write down which one and where.

Last session (9/20)	Exercise	Sets × Reps (today)	Weight (today)	Actual
10/side × 3 at 12.5 lb	Bulgarian Split Squat	3 × 10/side	12.5 lb	
10/side × 3 at 12.5 lb (top of range)	Single-Leg Romanian Deadlift	3 × 10/side	12.5 lb	
10 × 3 at 12.5 lb	Dumbbell Incline Press (<i>watch</i>)	3 × 10	12.5 lb	
10/side × 3 at 10 lb (top of range)	Renegade Row	3 × 10/side	10 lb	
10/side × 3, slow tempo (top of range)	Bird Dog	2 × 10/side, slow	bodyweight	
12/side × 3, slow tempo (top of range)	Dead Bug	2 × 12/side, slow	bodyweight	
Goblet carry 12.5 lb × 30 ft × 3 (9/20); Goblet Walk same (9/24)	Dumbbell Goblet Carry (<i>stays in place of the overhead carry</i>)	3 × 30 ft	12.5 lb	
12/side × 3, slow tempo (top of range)	Single-Leg Glute Bridge (<i>watch</i>)	3 × 12/side, slow	bodyweight	
20 reps × 3, black band (top of range)	Band Pull-Apart (<i>watch</i>)	3 × 20	black band	

Notes: Warm-up is 15 minutes. A flat walk is fine, and the hill is fine too if the hip feels completely normal. Six exercises topped their range on 9/20 (Single-Leg RDL, Renegade Row, Bird Dog, Dead Bug, Single-Leg Glute Bridge, Band Pull-Apart) and would have moved up under the old rule. They repeat instead, and today counts as the first of three clean sessions for each. Goblet Carry stays in place of the Overhead Carry because it caused no trouble on 9/20 or 9/24; switching back to the overhead version is your call once the shoulder has felt normal for a while. Stand or walk around between exercises rather than resting seated. Stop rule: any sharp, burning, tingling, or spreading pain is a stop, and mild irritation in a watch exercise is a stop for that exercise only.
