

Day C — Deload Week

Sunday, September 6, 2026

This is a deload session — the last of this week's three. Day A ran Tue 9/1, Day B ran Thu 9/3. Same 9 exercises as usual, but at roughly 60% of your normal working weight and reps back at the lower end of each range. Goal is recovery, not progression, this week. New 30 lb dumbbells are planned for the week of 9/8, so this closes out the deload cleanly before that jump.

Last session (8/30)	Exercise	Sets × Reps	Weight (deload)	Actual
10 lb × 12 reps/side	Bulgarian Split Squat	3 × 8/side	5 lb	
10 lb × 10 reps/side	Single-Leg Romanian Deadlift	3 × 8/side	5 lb	
10 lb × 12 reps	Dumbbell Incline Press	3 × 8	5 lb	
10 lb × 8 reps/side	Renegade Row	3 × 6/side	5 lb	
bodyweight × 10 reps/side	Bird Dog	2 × 8/side	bodyweight	
bodyweight × 12 reps/side	Dead Bug	2 × 10/side	bodyweight	
10 lb × 40 ft/side	Dumbbell Overhead Carry	3 × 30 ft/side	5 lb	
bodyweight × 12 reps/side	Single-Leg Glute Bridge	3 × 10/side	bodyweight	
black band × 15 reps	Band Pull-Apart	3 × 15	black band	

Bird Dog, Dead Bug, and Single-Leg Glute Bridge are bodyweight — no weight to cut, so the deload comes entirely from dropping reps to the bottom of each range instead. Band Pull-Apart was already at 15 reps (the bottom of its 15-20 range) last session, its first with a real band on hand, so there's no further reps room to give back — logged as a straight repeat rather than a true deload for this one exercise. Last deload session of the week — new 30 lb dumbbells still planned for the week of 9/8.
