

Day B

Thursday, October 1, 2026 — first full Day B since 9/17, regular exercises at 25 lb max

Eleven exercises, nothing goes up. Hammer Curl and Triceps Kickback are added at the end, same weight and reps as Tuesday. Goblet Walk replaces the Single-Arm Overhead Press, same as 9/24. The three that were at 30 lb on 9/17 drop to 25 lb at the same reps (Sumo Deadlift, Reverse Lunge, Suitcase Carry), matching Tuesday's Day A. Bent-Over Row and Side Plank repeat 9/17. Hip Bridge, Face Pull, and Lateral Raise come back lighter than 9/17 because they sit on the hip or shoulder that flared.

Watch today: Band Face Pull and Lateral Raise (shoulder: Face Pull irritated it on 9/24, and the front of the shoulder was mildly sore after Tuesday), and Stability Ball Hip Bridge (irritated the hip on 9/24). Stop that exercise if irritation comes back, even mildly, and write down which one and where.

Notes: Warm-up is 15 minutes; a flat walk is fine, and the hill is fine too if the hip feels completely normal. Hip Bridge returns at bodyweight because it irritated the hip on 9/24; if both sets feel completely normal, write that down and the 5 lb weight comes back next time. Lateral Raise goes back to 8 lb, since 10 lb only allowed 8 reps on 9/17. Take 1–2 minutes between exercises, and stand or walk around between sets. Stop rule: any sharp, burning, tingling, or spreading pain is a stop, and mild irritation in a watch exercise is a stop for that exercise only.
