

Day A

Tuesday, September 15, 2026

Two exercises step up this session: Single-Arm Row moves to 25 lb, Band Face Pull moves to the green band — both hit their rep ceilings on 9/8, reps reset to the bottom of range for each. Plank also reintroduces the shoulder-tap variation at 60 sec, per the standing plan note. Everything else keeps building at the same weight as last time.

Last session (9/8)	Exercise	Sets × Reps (today)	Weight (today)	Actual
30 lb × 8/8/8	Goblet Squat	3 × 9–10	30 lb	
30 lb × 8/8/8	Dumbbell Romanian Deadlift	3 × 9–10	30 lb	
25 lb × 15/15/8	Dumbbell Floor/Bench Press	3 × 12–15	25 lb	
20 lb × 12/12/12/side (topped range)	Single-Arm Dumbbell Row	3 × 8/side	25 lb	
12.5 lb × 10/10/10/side (topped range)	Single-Leg Balance Reach	2–3 × 8/side (or hold at 12.5 lb one more clean session — your call, see note)	12.5 lb or 15 lb	
60 sec, standard (no tap) × 3	Plank — shoulder-tap variation	2 × 60 sec	bodyweight	
30 lb × 70 ft × 3 (hit target)	Dumbbell Farmer's Carry	3 × 80–90 ft	30 lb	
30 lb × 15/15/15 (hit target)	Glute Bridge	3 × 16–18	30 lb	
purple band × 20/20/20 (hit soft ceiling)	Band Face Pull	3 × 12	green band	

Recommendations: Single-Arm Row and Band Face Pull both hit the top of their rep ranges on 9/8 (Row: 12/side at 20 lb; Face Pull: 20 reps at purple), so both step up this session — Row to 25 lb, Face Pull to the green band, reps reset to the bottom of range for each. Plank held a clean repeat of 60 sec standard on 9/8, so the shoulder-tap variation comes back in today at the same 60-sec target, per the standing plan note. Goblet Squat, Romanian Deadlift, Bench Press, Farmer's Carry, and Glute Bridge all still have room in their current rep ranges at their current weights — no weight change, just keep building reps (Bench Press was inconsistent across sets last time — 15/15/8 — so the goal today is getting all three sets solid in the 12–15 range before considering a bump). One flagged item not in the official plan note: Single-Leg Balance Reach also topped its range on 9/8 (10/side at 12.5 lb, extended to 3 sets), the same signal that triggered the Row and Face Pull bumps — but since the plan doc didn't explicitly call for a jump here, it's marked as optional today: either move up to 15 lb with reps back to 8/side, or hold at 12.5 lb for one more session to confirm the plateau before moving on. Flag whichever you choose so it can go in the plan notes afterward.
