

Day B

Thursday, September 17, 2026

Two exercises step up this session: Sumo Deadlift moves to 30 lb, Dumbbell Lateral Raise moves to 10 lb — both hit their rep ceilings on 9/10, reps reset to the bottom of range for each. Band Face Pull also topped its range (green band, 15 reps) but the next band level isn't confirmed as something you have on hand — see the note below rather than assuming a color.

Last session (9/10)	Exercise	Sets × Reps (today)	Weight (today)	Actual
25 lb × 20/20/20 (maxed)	Dumbbell Sumo Deadlift	3 × 8	30 lb	
30 lb × 8/8/8/side	Dumbbell Reverse Lunge	3 × 9–10/side	30 lb	
10 lb × 10/10/10/side	Single-Arm Dumbbell Overhead Press	3 × 11–12/side	10 lb	
green band × 10/10/10	Band Bent-Over Row	3 × 11–13	green band	
5 lb × 18/18/18	Stability Ball Hip Bridge/Hamstring Curl	2–3 × 19–20	5 lb	
10 lb × 50 sec/side × 3	Side Plank	2–3 × 55 sec/side	10 lb	
30 lb × 60 ft/side × 3	Single-Arm Suitcase Carry	3 × 70–80 ft/side	30 lb	
green band × 15/15/15 (topped range)	Band Face Pull	3 × 12 (<i>if a heavier band is on hand</i>) or 3 × 15 with a 2-sec pause (<i>if staying on green</i>)	green or next band	
8 lb × 15/15/15 (topped range)	Dumbbell Lateral Raise	3 × 12	10 lb	

Recommendations: Dumbbell Sumo Deadlift hit its 20-rep soft ceiling at the old 25 lb cap on 9/10, so it steps up to 30 lb today with reps reset to the bottom of range. Dumbbell Lateral Raise also topped its 12–15 range at 8 lb, so it moves to 10 lb with reps reset to 12. Band Face Pull topped its range too (15 reps on green), but since it's not confirmed whether a band heavier than green is in the home gym, the worksheet gives both options — move up if you have one, otherwise stay on green and add a 2-second pause at the top of each rep per the standing tempo/pause rule for maxed-out exercises. Reverse Lunge, Overhead Press, Bent-Over Row, and Suitcase Carry all still have room in their current ranges — no change needed, just keep building reps/distance at the same weight. Stability Ball Hip Bridge is closing in on the 20-rep soft ceiling at 5 lb (18 last time) — once it hits 20, the next lever is tempo/pause rather than more weight, same as Day A's Glute Bridge. Side Plank keeps building duration at the same 10 lb.
