

Day C

Sunday, October 4, 2026 — same loads as 9/27, two changes for the hip and arm

Nothing goes up today. Two new arm exercises are added at the end, different from the Hammer Curl and Kickback on the other days. Seven exercises repeat 9/27's weight and reps. Single-Leg RDL, Renegade Row, Bird Dog, and Dead Bug are on session two of three at the top of their range. Two changes: the Single-Leg Glute Bridge is swapped for the two-leg Glute Bridge at bodyweight, and Band Pull-Apart drops from 20 reps to 15.

Watch today: Glute Bridge (the single-leg version made the hip sore on 9/27, and the ball hip bridge irritated the left glute on Thursday), Band Pull-Apart (mild arm irritation on 9/27), and Dumbbell Incline Press (the front of the shoulder was mildly sore after Tuesday). Stop that exercise if irritation comes back, even mildly, and write down which one and where.

New on Day C (Hammer Curl 10/1: 10 x 3 at 10 lb)	Dumbbell Biceps Curl, palms up (<i>new</i>) Elbows pinned to your sides, palms forward, 3 seconds lowering.	3 x 10	10 lb	30–60 sec	
New on Day C (Kickback 10/1: 10/side x 3 at 8 lb)	Lying Dumbbell Triceps Extension (<i>new</i>) On your back, arms straight up over your chest. Bend only the elbows to lower the weights beside your ears, 3 seconds down.	3 x 10	8 lb each hand	30–60 sec	

Notes: Warm-up is 15 minutes; a flat walk is fine, and the hill is fine too if the hip feels completely normal. The Single-Leg Glute Bridge is on hold because it made the hip sore two Sundays in a row; the two-leg version is bodyweight only, slow, with a 1-second squeeze at the top. The arm exercise weights are a starting guess, so note if 10 reps feels easy or hard. Take 1–2 minutes between exercises, and stand or walk around between sets. Stop rule: any sharp, burning, tingling, or spreading pain is a stop, and mild irritation in a watch exercise is a stop for that exercise only.
